To Whom It May Concern:

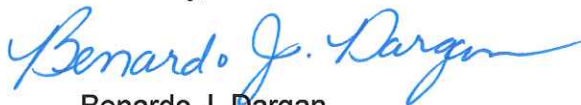

I write this recommendation on behalf of Mic Alexander, president of Image Wealth Management. Image Wealth is a training company that offers organizations and private individuals, personal and professional development training with an emphasis on "internal" image.

I've had the honor of advising Ms. Alexander on the development of her Image Wellness program for educational institutions. I believe in this program because I understand the important role that image plays in creating success. This program evokes a personal shift in the participants by bringing awareness to their negative "self-talk", communication style and body language, which are often barriers to achievement. Once they are "present" with their thoughts, they are introduced to specific tools that enable them to shift their thinking and their moods "upward" in order to move forward, even when under pressure.

I am of the opinion that this program is a dynamic complement to all educational institutions. Not only is it an obvious choice for student enrichment programming but it is also a powerful team-building tool for faculty and staff.

It is my pleasure to endorse Mic Alexander as an eminent trainer and the Image Wellness system as a cutting edge personal and professional development program.

Sincerely,

Benardo J. Dargan
